

Transitioning from Academia to Industry in a New Research Area

Allison Goins, Ph.D.

June 29th, 2021

About Me

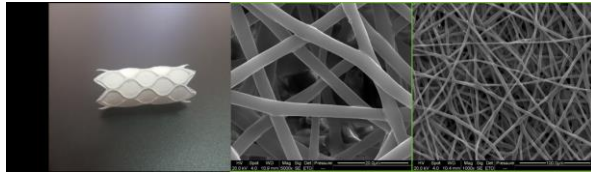

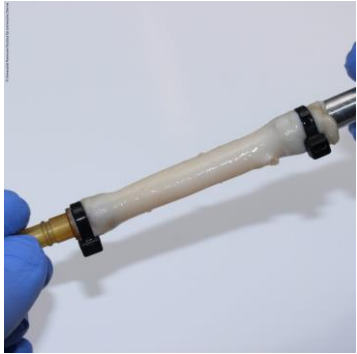

My Path

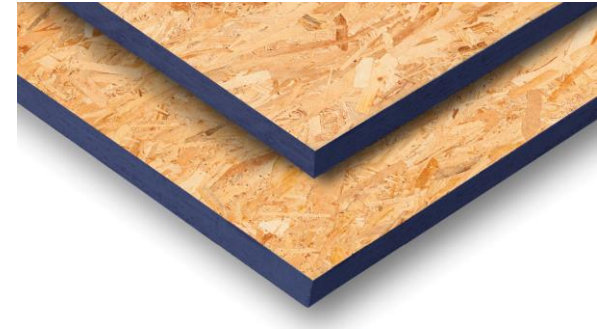

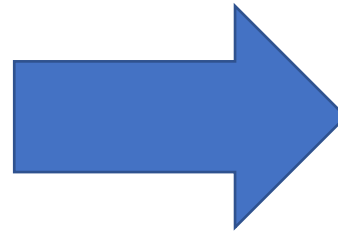

- Studied Materials Engineering at the University of Alabama at Birmingham
- Masters and Ph.D. from University of Florida in Materials Science and Engineering
 - Research Focus was Biomaterials, Tissue Engineering, and Regenerative Medicine
- Research and Development Engineer at Georgia-Pacific in the Building Products Division

Making the Switch

Biomaterials

Building Products

My Advice

**Look for skills that
are transferrable**

**Leverage managing
research projects to
convey project
management skills**

**Communicating
research at a high-
level like at poster
presentations**
